

Dear European DMT colleagues,

We proudly present a first literature database on DMT for the European DMT community. The initiative for this database was taken by EADMT research committee following from suggestions of our members during conference meetings. This first compilation was generously collected by Dr. Iris Bräuninger in 2019. The searches were collected in three groups:

systematic reviews or meta-analysis and DMT

<https://eadmt.com/?action=article&id=97>

randomised controlled trials and DMT

<https://eadmt.com/?action=article&id=98>

other studies on DMT

<https://eadmt.com/?action=article&id=99>

We do hope that you will enjoy this database and find it useful as a support to your own work. Please contact us in case you have any suggestions or comments on this document.

Best regards,

Dr. Rosemarie Samaritter
